Experience

iBase-t India Software Private Limited

Ahmedabad, Gujarat

Software Engineer (Hybrid)

Oct 2024 – Present

- Owned end-to-end design and delivery of a soft-delete, restore, and permanent-delete lifecycle for **1000+** hierarchical configuration entities, building the **React** UI with state-driven actions and instant status updates while enforcing dependency constraints and validation across **NFS** storage and **Redis** cache.
- Resolved a months-long pre-release defect causing **10,000+** i18n labels across **5+** languages to render as raw keys in the product interface; diagnosed a silent cache failure and implemented a fail-fast invalidation strategy.
- Architected and built a configurable **Node.js** CLI automating CVE remediation across **18+ repositories**, handling dependency upgrades, lockfile regeneration, **Git** branching and PR creation; cut per-cycle effort from **1–2 dev-days** to a **3–4 hour** unattended run, adopted team-wide at **2+ runs/week**.

SocialPilot Solutions LLP (Acquired by Group.One)

Ahmedabad, Gujarat

Junior Full Stack Developer (Onsite)

July 2024 – Oct 2024

- Built a video thumbnail selection in **React**, using **HTML Canvas** for client-side frame extraction, backed by **AWS S3**-triggered **Lambda** functions generating platform-specific thumbnails; reached **80%+** adoption across **12k+** customers and **25k+** connected accounts.
- Designed a geo-based anti-spam system in **Koa** authentication middleware using IP geolocation, blocking **5+ high-risk regions** responsible for **90%+** of fraudulent free-trial sign-ups.

Full Stack Intern (Onsite)

Jan 2024 – July 2024

- Contributed to migrating a **monolithic** database into a multi-database architecture separating platform-level and product-specific data, optimizing **5+** critical API queries and improving response times by **60%**.

Projects

ThreatFlow - AI-Powered CVE Remediation Pipeline | React, Node.js, Claude API, PostgreSQL

- Architected an end-to-end CVE remediation pipeline integrating **Jenkins**, **AquaSec** container scanning, and **Claude AI**; engineered a **Node.js** API layer that classifies vulnerabilities by severity and semver impact, invokes **LLM**-powered analysis for high/critical CVEs with breaking change detection, and auto-creates PRs for patch and minor upgrades.
- Built a **React + Tailwind** dashboard on **PostgreSQL** for scan history, CVE discovery, and remediation tracking; a single POC run detected **80 CVEs**, auto-created PRs, flagged an internal library as a vulnerability source, and dispatched **40+** AI-generated remediation reports.

Form 16 Distribution System | React, Firebase

- Architected a Form 16 finder for an accounting firm managing **4,000+** users, splitting a **5,000-page** bulk PDF into individual documents stored on **Firebase Storage** and served via **Cloud Functions**; built a **React** frontend for PAN-based retrieval scoped to internal staff only to protect sensitive income data.

Education

Birla Vishvakarma Mahavidyalaya Engineering College

Anand, Gujarat

B.Tech - Computer Engineering, CPI: 8.77

2020 – 2024

Technical Skills

- Languages:** HTML, CSS, JavaScript, TypeScript, C++
- Front-end:** React, Redux, Tailwind CSS, Micro Frontend Architecture
- Back-end:** Node.js, Express, Koa.js
- Databases:** MongoDB, Redis, PostgreSQL
- Cloud & DevOps:** AWS S3, AWS Lambda, Docker, Firebase, Git, Linux
- AI Tooling:** Claude Code, Multi-Agent Workflows, LLM API Integration

Achievements

- Awarded **Above & Beyond** recognition in **2 consecutive quarters** (individual and team) at iBase-t, a company-wide award among **150+** employees, for fast onboarding, ownership, and contributions to high-priority deliverables.
- Secured **2nd place** among **25+ teams** in an internal company-wide hackathon, building an AI-assisted debugging tool that surfaces error context and delivers fix suggestions via an in-app chat interface.
- 500+** DSA problems solved across all platforms, with a LeetCode max rating of **1640 (Profile)**

Leadership / Extracurricular

Google Developer Student Clubs

2022 – 2023

Campus Lead

- Led a team of **10** and managed a **700+ member community**, organizing **18 events**.
